

As with tradition, Maltimur held its second town hall for the year 2024 on Friday, 22 November.

This time, the team decided to go off-site to Lundu where the town hall was part of the Maltimur Away Day 2024 event. Some 110 staff from Maltimur and associate companies attended the event held at SALCRA Training Centre at Bajo, Lundu. Many others from Kuching, Limbang and overseas joined online to be part of this important annual event.

Team members were honoured. Project updates for the year 2024 were shared – on Sarawak Sabah Link Road (Phase 2), on Northern Coastal Highway, on completing and maintenance of the Pan Borneo Highway Sarawak. Corporate targets were announced and People-centric programmes were highlighted.

The theme for this Town Hall #02/2024 was 'Amanah Sustainability' – setting the tone for the presentations. Sustainability

efforts and initiatives were highlighted. From simple things like recycling and turning off the lights when not in use, to using Building Information Modelling (BIM) to better plan road alignments towards minimising impacts to the environment and design clashes, to supporting local capacity-building of young engineers and graduates through our Protégé programme. Indeed, Sustainability is more than just a catch phrase. Sustainability and ESG initiatives are very much a part of Maltimur and the way we work!

MALTIMUR TOWN HALL #2/2024
